

Simple and works
every time!

EASY SLIME

- 1/2 cup PVA glue
- 1 tsp bicarb of soda
- Food colouring etc
- 2 tbsp contact lens cleaner containing boric acid

1. Put PVA glue in a bowl and stir in the bicarb until all lumps have gone
2. Add any extras like colouring glitter, scented oils
3. Stir in around 2 tbsp of contact lens cleaner - keep stirring until gloopy then get your hands in and squeeze and stretch
4. Add more lens cleaner, small amount at a time, if still sticky
5. Keep in an air tight container
